

Job Vacancy - Service Engineer

Volspec Ltd are looking for a Service Engineer to join our engineering team; do you come from a mechanical background such as automotive, plant, forklift, ex-forces or mechanical engineering?

The role:

In this role you will be working on Marine and Industrial engines and associated products & equipment, and be responsible for:

- Diagnostics & fault finding
- Installation & commissioning
- Servicing & repairing
- Major component replacement & engine/transmission rebuilds & overhauls
- Software programming & Updating

Working within the Marine Leisure and Commercial sectors, along with Off-Highway vehicles and Power Generation equipment, you will receive market leading manufacturer based training on all variants of the equipment whilst working for a stable company, based out of either our Essex or Suffolk workshops

This role would ideally suit an experienced senior technician or engineer, or someone from a similar background with experience of mechanical & electrical control systems who is looking for the opportunity to receive market leading training and to progress in this demanding and varied industry

- Diagnostics, installing, repairing & rebuilding, servicing and maintaining Marine and Industrial engines and associated equipment, including exhaust aftertreatment systems and in time, electromobility applications
- Excellent manufacturer led training
- Overtime available
- Career progression within the role & within the company
- Yearly salary reviews
- Company vehicle

The ideal candidate:

- Team player with good communication skills
- Good attention to detail
- The ability to use own initiative
- Senior service technician or similar training/background
- A willingness to embrace & learn about new technologies and systems

Woodrolfe Road, Tollesbury,
